Mr. Bruce Ballard
Griffin Downtown Development Authority
Griffin, Georgia 30223

RE: Asbestos, Lead-Based Paint, Mold Inspection
& EDR Records Review
202 East Broad Street
Griffin, Georgia 30223
SEA Job No. 252-049

Dear Mr. Ballard:

Sailors Engineering Associates, Inc. (SEA) has completed our investigation of potential environmental concerns with regard to the Subject Property and is pleased to submit this report of our methods, findings, conclusions, and recommendations.

The purpose of our investigation was to identify any documented regulatory or historical evidence of on site or nearby environmental issues that may adversely impact the Subject Property. These would include what an ASTM compliant Phase I Environmental Site Assessment would identify as a Recognized Environmental Condition or REC. In addition, SEA conducted inspections and testing for potential environmental issues such as asbestos containing materials (ACM), lead based paint (LBP) and mold.

EDR RECORDS REVIEW

Standard Environmental Record Sources

As part of our regulatory records review, SEA requested, and has received, “The EDR Radius Map Report[®]” for the Subject Property from Environmental Data Resources, Inc. (EDR), Milford, Connecticut. The report identifies facilities in the area that appear on regulatory databases updated by EDR periodically. The approximate minimum search distances (AMSD) used were equal to or greater than the distances recommended in ASTM (American Society for Testing and Materials) Practice E 1527-21. For listings not mentioned in ASTM E 1527-21, a minimum search distance of an equivalent list was used.

1. United States Environmental Protection Agency National Priorities List (NPL) dated March 27, 2025 (AMSD = 1.0 mile) and the Delisted NPL Site List dated March 27, 2025 (AMSD = 1.0 mile).
2. United States Environmental Protection Agency Superfund Enterprise Management System (SEMS)/(CERCLIS) list dated March 27, 2025 and the SEMS

ARCHIVE/CERCLIS No Further Remedial Action Planned (NFRAP) listing dated March 27, 2025 (AMSD = 0.5 mile).

3. United States Environmental Protection Agency Resource, Conservation and Recovery Act (RCRA) Corrective Action sites (CORRACTS) listing dated June 2, 2025 (AMSD = 1.0 mile).
4. United States Environmental Protection Agency RCRA non-CORRACTS and Treat Storage and Disposal (TSD) facilities listing dated June 2, 2025 (AMSD = 0.5 mile).
5. United States Environmental Protection Agency RCRA generators listing dated June 2, 2025 (AMSD = 0.25 mile).
6. United States Environmental Protection Agency institutional controls/engineering control registries dated January 29, 2025 (AMSD = 0.5 mile).
7. United States Environmental Protection Agency Emergency Response Notification System (ERNS) National Response Center (NRC) spill reports through June 10, 2025 (AMSD = Subject Property only).
8. Georgia Department of Natural Resources Hazardous Site Inventory (HSI) dated July 1, 2024 (AMSD = 1.0 mile).
9. Georgia Department of Natural Resources Hazardous Sites Response Act release notification files (non-HSI) through September 16, 2024 (AMSD = 1.0 mile).
10. Georgia Department of Natural Resources Solid Waste landfill listing including active, closed and inert landfills dated December 19, 2024 (AMSD = 0.5 mile).
11. Georgia Department of Natural Resources Underground Storage Tank Management Program list of leaking underground storage tanks (LUST) dated December 4, 2024 (AMSD = 0.5 mile).
12. Georgia Department of Natural Resources Underground Storage Tank Management Program list of registered Underground Storage Tanks dated February 1, 2025 (AMSD = 0.25 mile).
13. Georgia Department of Natural Resources institutional control/engineering control registries dated January 27, 2025 (AMSD = 0.5 mile).
14. Georgia Department of Natural Resources Hazardous Site Reuse and Redevelopment Act list of properties that have entered the Voluntary Brownfield Program dated January 27, 2025 (AMSD = 0.5 mile).
15. Georgia Department of Natural Resources Hazardous Materials Information Reporting System dated June 11, 2025.

There are no current or delisted NPL sites within a one-mile radius of the Subject Property. There are no Federally-recognized or State-recognized tribal lands in Spalding County, Georgia. There are no Federal or State Institutional/Engineering Controls registered for the Subject Property.

The Subject Property does not appear on any of the regulatory lists reviewed. Several facilities within the ASTM-prescribed search distances from the Subject Property appeared on one or more of the regulatory lists reviewed. The closest facilities are discussed below:

Fire Station One (currently vacant lot) – is likely mislocated on the EDR Radius Report at 120 North 6th Street which is adjacent to the south and side-gradient to the Subject Property. Historical records identify this site as the location of the City of Griffin’s Light, Water and Sewer Department as far back as 1900 through around 2012, before the structure was razed. “**Fire Station One**” likely refers to the **City of Griffin Fire Dept.** (see below), and is misaddressed, as the **City of Griffin Fire Dept.** which shares the physical addresses of “102 North 6th Street” and “201 East Solomon Street.”

Spalding County Old Jail Facility (currently Waypoint) – located 232 East Broad Street is approximately 272-feet east and down-gradient of the Subject Property. The site is listed on the UST, LUST, UST Finder, UST Finder Release, and Financial Assurance databases. The UST and UST Finder databases list the site for the former operation of one (1) 10,000-gallon petroleum product underground storage tank (UST) with an unknown installation date, which was closed and removed from the ground on March 26, 1998. The LUST and UST Finder Release databases list the site for misreporting to GA EPD the sampling method used for soil sampling during tank closure activities. All samples collected and analyzed were below laboratory detection limits for petroleum products. After clarifying that the sampling methods used were acceptable, GA EPD issued a No Further Action Required letter for the site on October 27, 1998. The Financial Assurance database lists the site as formerly insured from March 23, 1998 through February 7, 2002. Based on soil sampling results during UST closure activities in 1998 and no other USTs remaining on site, **Spalding County Old Jail Facility** is not identified as a REC with regard to the Subject Property.

City of Griffin Fire Dept. (currently Historic City Hall) – formerly located at 201 East Solomon Street is approximately 311-feet south and side-gradient to the Subject Property. The site is listed on the UST, LUST, UST Finder, UST Finder Release, and Financial Assurance databases. The UST and UST Finder databases list the site for the former operation of two (2) petroleum USTs; one (1) 8,000-gallon tank installed in 1989 which was and closed and removed from the ground in February 2004, and one (1) 500-gallon tank with an unknown installation date that was discovered on the site during construction activities in November 2018 and removed from the ground shortly thereafter. The LUST and UST Finder Release databases list the site for two (2) reported releases, the first (1st) reported release occurred in January 2004, when elevated petroleum constituents were detected in the soil. This resulted in a Corrective Action Plan (CAP) – Part A for the site which included additional soil sampling and the installation of monitoring wells for groundwater sampling. As part of the CAP – Part A, the site groundwater was monitored quarterly up until June 6, 2006. Based on the plume geometry and the distance of the site from the nearest potential down-gradient receptor, the GA EPD granted the site a No Further

Action (NFA) status on January 16, 2007. The groundwater flow direction was determined to be to the southeast and away from the Subject Property. The second reported release occurred in November 2018, during removal sampling for the second UST discovered on site during construction activities. Analysis of the soil samples collected during removal of the second UST detected elevated petroleum constituents. Due to the close proximity of the second UST to the location of the previously removed tank, the results of the soil analysis were suspected to be residual from the previous release. Based on the previous characterization of the site as NFA by GA EPD, an NFA status was granted by GA EPD to the site for the second reported release on February 21, 2019. The Financial Assurance database lists the site as formerly insured under the GUST Trust Fund from June 22, 1998 through February 12, 2004. Based on the NFA status of the site, and groundwater flow direction determined to be to the southeast, away from the Subject Property, **City of Griffin Fire Dept.** is not identified as a REC with regard to the Subject Property.

City of Griffin (currently vacant lot) – formerly located at 231 East Solomon Street is approximately 393-feet and down-gradient of the Subject Property. The site once served as an auto body repair shop and filling station beginning around the late 1940s. The site is listed on the UST, UST Finder, and Financial Assurance databases. The UST and UST Finder databases list the site for the former operation of seven (7) petroleum USTs, all of them installed in 1986. Based on available information, all seven (7) USTs have been closed-in-place, but no date of closure was provided. SEA requested UST documentation from GA EPD, but the site has been classified as “inactive,” and no documents were available for review. Based on down-gradient location and inferred groundwater flow to be to the southeast and away from the Subject Property, **City of Griffin** is not identified as a REC with regard to the Subject Property.

Reeves Cleaners Inc. (currently ColorCo Hair Salon / Myrtle’s Plot Twist) – formerly located at 211 South 6th Street and partially mislocated on the EDR Radius Report (EDR Historical Auto), the site is approximately 1,106-feet south-southwest and hydrologically separated from the Subject Property. The site is listed on the EDR Historical Cleaner, Drycleaners, UST, LUST, UST Finder, UST Finder Release, and Financial Assurance databases. The EDR Historical Cleaner and Drycleaners databases list the site as a “drycleaning plant, except rugs” from 1969 to 1977. The UST and UST Finder databases list the site for the former operation of one (1) 500-gallon petroleum UST, installed in 1974 and closed-in-place with no date of closure provided. The LUST and UST Finder Release databases list the site for a reported release on April 7, 1999, with a NFA date of June 4, 1999. The Financial Assurance database lists the site as formerly insured from May 1986 to June 1999. Based on topographic and hydrologic distance and separation, **Reeves Cleaners Inc.** is not identified as a REC with regard to the Subject Property.

In addition to the facilities mentioned above, additional facilities within the prescribed ASTM minimum search distances from the Subject Property appeared on one or more of the regulatory lists reviewed. Upon review, these facilities were not identified as RECs with regard to the Subject Property due to the facility type and operations, topographic distance and separation, hydrologic gradient relative to the Subject Property, being mislocated on the EDR report, or a combination of these factors. Further information on these facilities and all of the facilities mentioned above is available in the attached EDR Radius Map Report with GeoCheck.

Historical Use Information on the Property and Vicinity

To determine past uses of the Subject Property, ownership records were reviewed on the Georgia Superior Court Clerk's Cooperative Authority website or at the Spalding County Tax Assessor's website. In addition, aerial photographs and Sanborn Fire Insurance Maps were researched.

Sanborn Fire Insurance Maps for the Subject Property were requested from Environmental Data Resources (EDR), Milford, Connecticut. Sanborn maps dated 1900, 1905, 1909, 1915, 1925, 1949, 1958, and 1961 were available for review. The 1900 and 1905 Sanborn maps depict the historical church structure on the Subject Property, and a residential structure in the northwest Property interior. The 1909 Sanborn map depicts the previous residential structure has been razed, and a new residential structure has been constructed in the northeast Property interior. No significant changes are depicted on the 1915 to 1961 Sanborn maps.

Sanborn Fire Insurance Maps reviewed for the Subject Property were also reviewed for the surrounding vicinity. The 1900 to 1909 Sanborn maps depict Griffin Electric Light and Water Works on the parcel adjacent to the south of the Subject Property. The railroad is depicted to the north of the Subject Property, and Newton Coal and Lumber Company to the northwest, along the railroad. **The Spalding County Old Jail Facility** is depicted to the east of the Subject Property. A majority of the remaining structures in the immediate vicinity surrounding the Subject Property are depicted as residential. The 1915 Sanborn map depicts that the Griffin Electric Light and Water Works adjacent to the south of the Subject Property has had some construction additions and is now labeled as the City Light, Water and Sewer Department. Additionally, the **City of Griffin Fire Dept./Fire Station One** has been constructed to the south of the Subject Property in the location of a former residential structure. The 1925 Sanborn map depicts the construction of an auto garage on the parcel adjacent south of the Subject Property. The 1949 Sanborn map depicts the expansion of the same garage and new labeling as City Garage. To the southeast of the Subject Property, an auto body repair and paint shop, sales & service, and filling station commercial structures have been constructed in the location of the **City of Griffin** site at 231 East Solomon Street. No significant changes are depicted on the 1958 and 1961 Sanborn maps.

Aerial photographs were requested from Environmental Data Resources (EDR), Milford, Connecticut. Aerial photographs dated 1941, 1947, 1951, 1958, 1962, 1969, 1973, 1981, 1988, 1993, 1999, 2010, 2015, 2019, and 2023 were available for review. SEA also reviewed the most recent 2025 aerial photograph from Google Earth. The 1941 to 2025 aerial photographs depict the historical church structure and a residential structure on the Subject Property.

Aerial photographs reviewed for the Subject Property were also reviewed for the surrounding vicinity. The 1941 to 2025 aerial photographs depict the area surrounding the Subject Property as highly developed with a mixture of residential and commercial structures. The 2015 aerial photograph depicts the former City of Griffin Light, Water and Sewer Department office adjacent to the south of the Subject Property has been razed and is now a grass field. The **City of Griffin** site at 231 East Solomon Street, which historically served as a gasoline filling station starting in the late 1940s has also been razed.

ASBESTOS INSPECTION

Our inspection included both the ground-level and basement level of the historical church structure which combined measures approximately 6,270-feet. Based on historical records reviewed, the structure was originally constructed in 1910. Interior building materials identified as suspect to contain ACMs includes wallboard and joint compound on both levels, and ceiling board and a small patch of remaining floor tile on the basement level. The majority of flooring on the basement level has been removed down to bare concrete, and flooring on the ground level consists of wood. No exterior building materials were identified as suspected to contain ACMs.

On July 2, 2025, Anthony Nauman, an AHERA Accredited Asbestos in Building Inspector sampled materials suspect to contain ACMs. Building materials suspected to contain ACM for the subject building were collected via bulk sampling method and submitted for analysis by Polarized Light Microscopy (PLM) method. A total of eleven (11) bulk samples were collected and submitted under chain-of-custody procedures. A total of twenty-three (23) distinct materials were identified and analyzed. Both the wallboard and floor tile consisted of multiple layers.

Laboratory analysis did not identify ACM in any of the samples including the nine (9) bulk samples collected of wallboard, the one (1) ceiling board, or the one (1) floor tile.

LEAD-BASED PAINT INSPECTION

On July 2, 2025, SEA utilized a handheld X-ray florescent (XRF) analyzer on all homogeneous paint types throughout the interior of the structure. On the ground floor level, two (2) homogenous paint types were identified. Low levels (1.20% - 1.56%) of lead (Pb) were detected in the remnants of peeling blue paint on the east/southeast interior wall. The remaining interior walls on the ground floor were covered with a white paint which contained very low levels of lead (0.212% - 0.268%).

SEA identified four (4) homogenous paint types on the interior walls of the basement level which all contained very low levels of lead. The blue paint over the brick on portions of the north and east walls near the staircase contained around 0.452% lead. The off-white paint over the brick on portions of the north and south walls contained around 0.061% lead. The yellow paint on the drywall in the southeastern corner of the basement level contained around 0.332% lead. The remaining white paint on portions of the north, west, and south walls contained around 0.233% lead.

The Occupational Safety and Health Administration (OSHA) worker protection regulations, including protections for exposure to lead paint, are enforced by the local office of OSHA. OSHA has established Safety and Health Regulations for Construction under CFR Part 1926. Sub-Part 1926.62 of those regulations address activities where lead or lead containing materials may be present. Based on OSHA regulations regarding worker exposure, any detectable lead in a paint makes it a lead-based paint for purposes of complying with OSHA regulations. SEA recommends following the lead exposure guidance given in CFR 1926.62 during any demolition activities.

MOLD INSPECTION

On July 2, 2025, SEA observed suspected visible mold growth and moisture saturated building materials in three (3) locations. In the locations of observed suspected mold growth, SEA collected mold swab samples in two (2) locations on the ground floor level, and one (1) location on the basement level to determine the type of mold present and its relative quantity. All collected samples were submitted to Eurofins Environmental Testing for mold analysis.

The results of the laboratory analysis of the mold swab samples identified heavy/very heavy growth of *Cladosporium* species in the two (2) swab samples collected on the ground floor level, and the one (1) swab sample collected from the basement level identified very heavy growth of *Stachybotrys* species. *Stachybotrys* is often referred to as “black mold” and is often associated with sick building syndrome and can result in health problems for otherwise healthy individuals. *Cladosporium* species are fairly common and can result in respiratory systems in sensitive individuals.

FINDINGS AND CONCLUSIONS

Several facilities within the ASTM-prescribed search distances from the Subject Property appeared on one or more of the regulatory lists reviewed. The closest facilities are discussed below:

Fire Station One / City of Griffin Fire Dept. – formerly located at 201 East Solomon Street is approximately 311-feet south and side-gradient to the Subject Property. The site is listed on the UST, LUST, UST Finder, UST Finder Release, and Financial Assurance databases. Based on the NFA status of the site, and groundwater flow direction determined to be to the southeast, away from the Subject Property, **Fire Station One/City of Griffin Fire Dept.** is not identified as a REC with regard to the Subject Property.

Spalding County Old Jail Facility – located 232 East Broad Street is approximately 272-feet east and down-gradient of the Subject Property. The site is listed on the UST, LUST, UST Finder, UST Finder Release, and Financial Assurance databases. Based on soil sampling results during UST closure activities in 1998 and no other USTs remaining on site, **Spalding County Old Jail Facility** is not identified as a REC with regard to the Subject Property.

City of Griffin – formerly located at 231 East Solomon Street is approximately 393-feet and down-gradient of the Subject Property. The site is listed on the UST, UST Finder, and Financial Assurance databases. Based on down-gradient location and inferred groundwater flow to be to the southeast, away from the Subject Property, **City of Griffin** is not identified as a REC with regard to the Subject Property.

Reeves Cleaners Inc. – formerly located at 211 South 6th Street and partially mislocated on the EDR Radius Report (EDR Historical Auto), the site is approximately 1,106-feet south-southwest and hydrologically separated from the Subject Property. The site is listed on the EDR Historical Cleaner, Drycleaners, UST, LUST, UST Finder, UST Finder Release, and Financial Assurance

databases. Based on topographic and hydrologic distance and separation, **Reeves Cleaners Inc.** is not identified as a REC with regard to the Subject Property.

Based on ownership records and other historic records reviewed, the Subject Property has been developed with the historical church structure since at least 1900. There was also a residential structure on the Property at this time that was demolished and replaced by a new residential structure sometime around 1909. This structure was also demolished in 2025 and currently only the historical church structure remains on the Subject Property. The Subject Property does not appear on any of the regulatory lists reviewed.

Laboratory analysis did not detect ACM in any of the eleven (11) bulk samples collected during SEA's asbestos inspection of the interior building materials in the structure on the Subject Property.

Based on the results of the handheld XRF field analysis, lead compounds were detected on every painted wall on both the ground floor and basement levels of the structure. As noted above, OSHA regulations regarding worker safety during demolition/renovation activities state that any detectable lead in a paint classifies it as a lead-based paint and provides guidance in CFR 1926.62. Lead-based paint abatement should be carried out by a licensed contractor for all painted surfaces subject to demolition and/or renovation.

Based on the results of the mold swab analysis, SEA identified at least two (2) areas on the ground floor of the structure indicating heavy to very heavy *Cladosporium* species growth. *Cladosporium* is otherwise known as "common mold," and while it is generally harmless, can cause allergies or respiratory issues in sensitized individuals. SEA also identified at least one (1) area on the basement floor level indicating very heavy growth of *Stachybotrys*. As noted above, *Stachybotrys* is often referred to as "black mold" and is often associated with sick building syndrome and can result in health problems for otherwise healthy individuals.

RECOMMENDATIONS

SEA recommends that the source of any water intrusion which is supporting the growth of mold be identified and abated and that any visible mold throughout the structure be cleaned by a qualified contractor using an appropriate cleaner. Cleaning solutions containing a quaternary ammonium compound have been found to be effective in killing the mold and preventing its spread. SEA also recommends that proper ventilation of the building be restored in order to limit future mold growth and that access to the basement be limited until the mold have been abated.

It must be noted that the results are representative of conditions at the time of sampling. Changes in conditions, such as changes in temperature or humidity, may result in variation in the presence or absence of mold and fungi.

CLIENT PROJECT: 202 E Broad St
LAB CODE: 671089-1

Dear Anthony,

Enclosed are asbestos analysis results for PLM Bulk samples received at our laboratory on July 3, 2025. The samples were analyzed for asbestos using polarizing light microscopy (PLM) per the EPA 600/R-93/116: Method for the Determination of Asbestos in Bulk Building Materials and EPA 40 CFR Appendix E to Subpart E of Part 763: Interim Method of the Determination of Asbestos in Bulk Insulation Samples.

Sample results containing >1% asbestos are considered asbestos-containing materials (ACMs) per EPA regulatory requirements. The detection limit for the EPA 600 Method is <1% by calibrated visual estimate.

Thank you for your business and we look forward to continuing good relations.

Kind Regards,

Dana Till,
QA Manager

METHOD: EPA 600 / R93 / 116 and EPA 40 CFR Appendix E to Subpart E of Part 763**REPORTING LIMIT:** 1% by calibrated visual estimation**REGULATORY LIMIT:** 1%

Due to the limitations of the EPA 600 / R93 / 116 method, nonfriable organically bound materials (NOBs) such as vinyl floor tiles can be difficult to analyze via polarized light microscopy (PLM). EPA recommends that all NOBs analyzed by PLM, and found not to contain asbestos, be further analyzed by Transmission Electron Microscopy (TEM). Please note that PLM analysis of dust and soil samples for asbestos is not covered under NVLAP accreditation. Estimated measurement of uncertainty is available on request.

Eurofins Built Environment Testing East, LLC makes no warranty representation regarding the accuracy of client submitted information in preparing and presenting analytical results. Interpretation of the analytical results is the sole responsibility of the client. This report relates only to the samples tested or analyzed and may not be reproduced, except in full, without written approval by Eurofins Built Environment Testing East, LLC. Samples were received in acceptable condition unless otherwise noted. This report may not be used by the client to claim product endorsement by NVLAP or any other agency of the U.S. Government.

Dear Anthony,

Enclosed are mold analysis results for bulk samples received at our laboratory on July 3, 2025. The samples were analyzed for mold spores using nonviable methodology.

Thank you for your business and we look forward to continuing good relations.

Kind Regards,

Dana Till,
QA Manager

DIRECT MICROSCOPIC EXAMINATION REPORT

Background Debris and/or Description	Miscellaneous Spores Present*	MOLD GROWTH: Molds seen with underlying mycelial and/or sporulating structures†	Other Comments††	General Impression
Lab ID-Version‡: 20651350-1, Analysis Date: 07/11/2025: Swab sample SMS-1: Mold Swab				
Light	None	4+ <i>Cladosporium</i> species (spores, hyphae, conidiophores)	None	Mold growth
Lab ID-Version: 20651351-1, Analysis Date: 07/11/2025: Swab sample SMS-2: Mold Swab				
Light	None	3+ <i>Cladosporium</i> species (spores, hyphae, conidiophores)	None	Mold growth
Lab ID-Version: 20651352-1, Analysis Date: 07/11/2025: Swab sample SMS-3: Mold Swab				
Light	None	4+ <i>Stachybotrys</i> species (spores, hyphae, conidiophores)	None	Mold growth

* Indicative of normal conditions, i.e. seen on surfaces everywhere. Includes basidiospores (mushroom spores), myxomycetes, plant pathogens such as ascospores, rusts and smuts, and a mix of saprophytic genera with no particular spore type predominating. Distribution of spore types seen mirrors that usually seen outdoors.

† Quantities of molds seen growing are listed in the MOLD GROWTH column and are graded <1+ to 4+, with 4+ denoting the highest numbers.

†† Some comments may refer to the following: Most surfaces collect a mix of spores which are normally present in the outdoor environment. At times it is possible to note a skewing of the distribution of spore types, and also to note "marker" genera which may indicate indoor mold growth. Marker genera are those spore types which are present normally in very small numbers, but which multiply indoors when conditions are favorable for growth.

‡ A "Version" indicated by -"x" after the Lab ID# with a value greater than 1 indicates a sample with amended data. The revision number is reflected by the value of "x".
The limit of detection is < 1+ when mold growth is detected.

For additional information necessary for the interpretation of the results, all readers are advised to refer to the document "Direct Exam Details Page" which is available on our website at:

Date of Sampling: 07-02-2025
Date of Receipt: 07-07-2025
Date of Report: 07-11-2025

Mold/Fungal Growth Rating Details

Growth Rating	Quantities of molds indicating growth are listed in the MOLD/FUNGAL GROWTH section. Judgement is used in determining the amount of growth present in the sample. For example, if only one portion of the sample has evidence of heavy growth, then it will receive a rating of heavy growth even though, strictly speaking, on a percentage basis of the entire sample, the amount of growth is low.	
	Swab/Tape/Dust/Wipe sample	Bulk Sample
< 1+ (Very Light Growth)	Evidence of very light growth observed on the sample as indicated by spores of one type seen with underlying mycelial and/or with their sporulating structures found in less than 10% of the microscopic fields examined.	Areas of very light growth detected by the presence of spores of one type seen with underlying mycelial and/or with their sporulating structures in the bulk sample.
1+ (Light Growth)	Evidence of light growth observed on the sample as indicated by spores of one type seen with underlying mycelial and/or with their sporulating structures found in 10 to 25% of the microscopic fields examined.	Areas of light growth detected by the presence of spores of one type seen with underlying mycelial and/or with their sporulating structures in the bulk sample.
2+ (Moderate Growth)	Evidence of moderate growth observed on the sample as indicated by spores of one type seen with underlying mycelial and/or with their sporulating structures found in 26 to 50% of the microscopic fields examined.	Areas of moderate growth detected by the presence of spores of one type seen with underlying mycelial and/or with their sporulating structures in the bulk sample.
3+ (Heavy Growth)	Evidence of heavy growth observed on the sample as indicated by spores of one type seen with underlying mycelial and/or with their sporulating structures found in 51 to 75% of the microscopic fields examined.	Areas of heavy growth detected by the presence of spores of one type seen with underlying mycelial and/or with their sporulating structures in the bulk sample.
4+ (Very Heavy Growth)	Evidence of very heavy growth observed on the sample as indicated by spores of one type seen with underlying mycelial and/or with their sporulating structures found to be nearly confluent in the majority of the microscopic fields examined.	Areas of very heavy growth detected by the presence of spores of one type seen with underlying mycelial and/or with their sporulating structures in the bulk sample.

Miscellaneous Spores

Slides/specimens are examined for the presence of mold spores and pollen, noting the quantities and distribution of spore types found. A designation of 'normal trapping' is made when a mix of spore types is present with the same general distribution as is usually found outdoors. In other words, the biological component of the sample surface is like that found everywhere. Types of spores present would include basidiospores (mushroom spores), myxomycetes (slime molds), plant pathogens such as ascospores, rusts and smuts, and a mix of saprophytic genera with no particular spore type predominating. Many of these spore types would not be found growing indoors on building materials since many plant pathogens require living plants for growth, and mushrooms require compost, leaf duff of various types, or associations with roots of certain trees, etc. Due to these factors, when a mix of spores seen include these types as well as pollen, the rational source is the outside air, rather than indoor mold growth. The numbers of miscellaneous spores seen are graded and described as shown below as none, very few, few, variety, and wide variety.

None	Very Few	Few	Variety	Wide Variety
No spores detected	Very few spores detected	A few spores detected	Many spores containing a variety of different genera detected	Many spores containing a wide variety of different genera detected

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Sailors Eng Assoc Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL..... National Priority List
Proposed NPL..... Proposed National Priority List Sites
NPL LIENS..... Federal Superfund Liens

Lists of Federal Delisted NPL sites

Delisted NPL..... National Priority List Deletions

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY..... Federal Facility Site Information listing
SEMS..... Superfund Enterprise Management System

Lists of Federal RCRA TSD facilities

RCRA-TSDF..... RCRA - Treatment, Storage and Disposal

Lists of Federal RCRA generators

RCRA-LQG..... RCRA - Large Quantity Generators
RCRA-SQG..... RCRA - Small Quantity Generators
RCRA-VSQG..... RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

Federal institutional controls / engineering controls registries

LUCIS..... Land Use Control Information System
US ENG CONTROLS..... Engineering Controls Sites List
US INST CONTROLS..... Institutional Controls Sites List

Federal ERNS list

ERNS..... Emergency Response Notification System

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF..... Solid Waste Disposal Facilities

EXECUTIVE SUMMARY

Lists of state and tribal leaking storage tanks

INDIAN LUST..... Leaking Underground Storage Tanks on Indian Land

Lists of state and tribal registered storage tanks

FEMA UST..... Underground Storage Tank Listing

INDIAN UST..... Underground Storage Tanks on Indian Land

State and tribal institutional control / engineering control registries

INST CONTROL..... Public Record List

AUL..... Uniform Environmental Covenants

Lists of state and tribal voluntary cleanup sites

INDIAN VCP..... Voluntary Cleanup Priority Listing

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS..... A Listing of Brownfields Sites

Local Lists of Landfill / Solid Waste Disposal Sites

SWRCY..... Recycling Center Listing

HIST LF..... Historical Landfills

INDIAN ODI..... Report on the Status of Open Dumps on Indian Lands

ODI..... Open Dump Inventory

DEBRIS REGION 9..... Torres Martinez Reservation Illegal Dump Site Locations

IHS OPEN DUMPS..... Open Dumps on Indian Land

RGA LF..... Recovered Government Archive Solid Waste Facilities List
RGA LUST..... Recovered Government Archive Leaking Underground Storage Tank

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/27/2025 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/02/2025 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lists of state- and tribal hazardous waste facilities

SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Natural Resources' Hazardous Site Inventory.

A review of the SHWS list, as provided by EDR, and dated 07/01/2024 has revealed that there are 2 SHWS sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Lists of state and tribal leaking storage tanks

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Natural Resources' Confirmed Release List.

A review of the LUST list, as provided by EDR, and dated 12/04/2024 has revealed that there are 21 LUST sites within approximately 0.5 miles of the target property.

Lists of state and tribal brownfield sites

BROWNFIELDs: The Brownfields Public Record lists properties where response actions under the Georgia Hazardous Site Reuse and Redevelopment Act are planned, ongoing or completed.

A review of the BROWNFIELDs list, as provided by EDR, and dated 01/27/2025 has revealed that there are 2 BROWNFIELDs sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/02/2025 has revealed that there are 5 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 18 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories. UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as e-Manifest, will modernize the nation's cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 02/17/2025 has revealed that there is 1 E MANIFEST site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EXECUTIVE SUMMARY

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
GRIFFIN GAS LIGHT AN	314 W COLLEGE ST	SW 1/2 - 1 (0.521 mi.)	V73	171

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

BAKER COAL CO	101 W BROAD WAY	W 0 - 1/8 (0.111 mi.)	F14	28

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.

ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichloroethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene,

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Georgia's Geographic Environmental Information Management System (GEIMS) provides the EPA and the public a single point of access to core data for all facilities and sites regulated or monitored by the EPA and a single system for the reporting of all environmental data.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. Georgia's Geographic Environmental Information Management System (GEIMS) provides the EPA and the public a single point of access to core data for all facilities and sites regulated or monitored by the EPA and a single system for the reporting of all environmental data.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/20/2024

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 03/27/2025	Source: EPA
Date Data Arrived at EDR: 04/01/2025	Telephone: 800-424-9346

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 06/02/2025	Source: EPA
Date Data Arrived at EDR: 06/03/2025	Telephone: 800-424-9346
Date Made Active in Reports: 06/16/2025	Last EDR Contact: 06/03/2025
Number of Days to Update: 13	Next Scheduled EDR Contact: 09/29/2025
	Data Release Frequency: Quarterly

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/02/2025	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/04/2025	Telephone: (404) 562-8651

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/02/2025	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/04/2025	Telephone: (404) 562-8651

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Data Release Frequency: Quarterly

Lists of state- and tribal hazardous waste facilities

SHWS: Hazardous Site Inventory

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 07/01/2024

Next Scheduled EDR Contact: 09/29/2025

Data Release Frequency: Annually

NON HSI: Non-Hazardous Site Inventory

This list was obtained by EDR in 1998 and contains property listings that have reported contamination of soil or groundwater under the Georgia Hazardous Site Response Act (HSRA). These sites were not placed on the Georgia Priority list (Hazardous Site Inventory or HSI) because their hazard evaluation scores did not exceed the threshold levels established for sites posing an imminent threat to health or the environment. Disclaimer provided by Rindt-McDuff Associates - the database information has been obtained from publicly available sources produced by other entities. While reasonable steps have been taken to insure the accuracy of the data, RMA does not guarantee the accuracy of the data. No claim is made for the actual existence of pollution at any site. This data does not constitute a legal opinion.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
13255C0185D	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
13255C0090D	FEMA FIRM Flood data

13255C0205D	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
GRIFFIN SOUTH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Paleozoic

Code: mm1 (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Metamorphic Rocks

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: CECIL

Soil Surface Texture: sandy clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained. Soils have intermediate water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 2.00 Min: 0.60	Max: 6.50 Min: 4.50
2	7 inches	11 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 2.00 Min: 0.60	Max: 5.50 Min: 4.50
3	11 inches	50 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 2.00 Min: 0.60	Max: 5.50 Min: 4.50
4	50 inches	75 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: sandy loam
loam
fine sandy loam

Surficial Soil Types: sandy loam
loam
fine sandy loam

Shallow Soil Types: clay
sandy clay
gravelly - loam

Deeper Soil Types: loamy fine sand
sandy loam
weathered bedrock

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

FED USGS USGS40000262476

Organization ID: USGS-GA
Monitor Location: 11Z021
Description: Not Reported
Drainage Area: Not Reported
Contrib Drainage Area: Not Reported
Aquifer: Not Reported
Aquifer Type: Not Reported
Well Depth: Not Reported
Well Hole Depth: Not Reported

Organization Name: USGS Georgia Water Science Center
Type: Well
HUC: 03130005
Drainage Area Units: Not Reported
Contrib Drainage Area Unts: Not Reported
Formation Type: Not Reported
Construction Date: Not Reported
Well Depth Units: Not Reported
Well Hole Depth Units: Not Reported

GEOCHECK® - PHYSICAL SETTING SOURCE MAP FINDINGS RADON

AREA RADON INFORMATION

Federal EPA Radon Zone for SPALDING County: 2

Note: Zone 1 indoor average level > 4 pCi/L.

: Zone 2 indoor average level >= 2 pCi/L and <= 4 pCi/L.

: Zone 3 indoor average level < 2 pCi/L.

Federal Area Radon Information for Zip Code: 30223

Number of sites tested: 14

Area	Average Activity	% <4 pCi/L	% 4-20 pCi/L	% >20 pCi/L
Living Area - 1st Floor	2.136 pCi/L	79%	21%	0%
Living Area - 2nd Floor	Not Reported	Not Reported	Not Reported	Not Reported
Basement	3.200 pCi/L	75%	25%	0%

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

DNR Managed Lands

Source: Department of Natural Resources

Telephone: 706-557-3032

This dataset provides 1:24,000-scale data depicting boundaries of land parcels making up the public lands managed by the Georgia Department of Natural Resources (GDNR). It includes polygon representations of State Parks, State Historic Parks, State Conservation Parks, State Historic Sites, Wildlife Management Areas, Public Fishing Areas, Fish Hatcheries, Natural Areas and other specially-designated areas. The data were collected and located by the Georgia Department of Natural Resources. Boundaries were digitized from survey plats or other information.

RADON

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.
